of uncoupling your trailer.
Driver controlled traction differential.

The Freightliner chassis that you are receiving is specified with serviceability in mind. That is why you see such components common to the trucking industry as the WABCO 4S/4M ABS, Meritor 16K# and 23K# axles and the 23K# Airliner rear suspension. We want any technician in any Freightliner dealership to be able to service your truck and also increase the probability of the parts being on the shelf as well. Freightliner also has over 150 dealerships around the country that are open 24 hours a day and seven days a week, in addition to the other 100+ Freightliner dealers that are here to support you. This is just a partial listing of the specifications on your new Freightliner Columbia CL120 chassis. If you need more in depth information on your specifications or on how your Freightliner will behave on the road, simply ask your Renegade Representative and they will forward the information.

Includes Freightliner Extended Warranty-See Dealer for Details
